About

EE student at the Technion (GPA 90.6) who enjoys turning ideas into models, and models into hardware. Looking for a student position in embedded systems, power, or optics.

Education

B.Sc. in Electrical Engineering, Technion – Israel Institute of Technology 2024 – Present

GPA: 90.6/100 · **Dean's Honor Roll, Spring 2025** · Expected graduation: 2028

Relevant coursework: Digital Systems, Electronic Circuits, Signals & Systems, Electromagnetic Fields, Data Structures & Algorithms

Projects

Remote-Controlled Car with Closed-Loop Speed Control | C, Raspberry Pi Pico 2 W 2026

Built on my own to put what I'd learnt at the Technion to use (GitHub). I modelled the motors, designed a PI controller with feedforward that maintains velocity using wheel encoder feedback, and wrote the firmware in C. It's driven over Wi-Fi, and since the chassis has no steering rack, it turns tank-style.

Snake Game on FPGA | SystemVerilog, Quartus, Intel Cyclone V SoC 2026

A retro-style Snake game built in hardware for EE Lab 1 with an awesome partner. I designed the movement logic, graphics, sound, and game state machine.

The Mirror Project: Passive Wi-Fi Reflector | RF propagation 2026

Designed a simple aluminium-foil-lined reflector box that redirects a router's signal around metal doors and reinforced-concrete safe rooms (Mamad). It raised throughput in the dead zone from 5 to 200 Mbps at almost no cost, where commercial repeaters had failed.

Military Service

IDF Armored Corps – First Sergeant, 52nd Battalion, 401st Brigade. 2020 – 2023

Loader in the experimental crew for the Merkava Barak tank prototype. Field-tested its new systems alongside engineers from Elbit, El-Op, and the Tank Development Authority, and trained crews across the Armored Corps on the new tank.

Received Certificate of Excellence, 52nd Battalion (2022).

Reserve duty: Sergeant Major, 2023 – Present.

Skills

Technical: C (Raspberry Pi Pico SDK), SystemVerilog, Quartus, MATLAB, Git, soldering & hardware prototyping.
Languages: Hebrew (native), English (fluent).
